PROFILE

Technical product manager with a software engineering foundation and experience building customer-facing mobile, cloud-connected, and hardware-software products. Launched an offline-first mobile survey product, scaled a distributed engineering team from 2 to 12, supported approximately monthly releases, and contributed to \$20K-\$50K in recurring monthly revenue. Recent UW and WGU work adds current practice in roadmaps, customer validation, SaaS requirements, user stories, acceptance criteria, UAT, product metrics, and Agile delivery.

PRODUCT & TECHNICAL STRENGTHS

Product: Roadmaps • Backlog Prioritization • Customer Discovery • Requirements • User Stories • Acceptance Criteria • Product Validation • UX Collaboration • Release Planning • Product Metrics

Technical: Agile/Scrum • SaaS • Mobile (iOS/Android) • APIs/Cloud Integration • SQL • Jira • Figma • Wix/Wix Studio • Data Visualization • Generative AI Tools

EXPERIENCE

Product Development Manager | Survey Analytics *Seattle, WA | 2010-2012*

- Built the mobile product division and launched SurveyPocket across iOS, Android, and Amazon marketplaces; owned an offline-to-cloud survey workflow for field researchers.
- Gathered customer requirements, prioritized the backlog by urgency, and coordinated approximately monthly releases for enterprise and research users.
- Scaled a distributed engineering team from 2 to 12; supported customers including St. Jude Medical and the Country Music Awards through discovery, training, support, and product documentation.
- Contributed to approximately \$20K-\$50K in recurring monthly revenue through mobile deployments.

Product Owner | Reischling Press, Inc. *Tukwila, WA | 2012*

- Collected custom-product specifications and coordinated requirements across approximately six business, finance, production, and software functions; supported Costco, Vistaprint, and Shutterfly programs.
- Designed company-wide Agile training and introduced Agile/Waterfall concepts to improve largely manual production-management processes.

Software Engineer | Cytopeia / BD Biosciences *Seattle, WA | 2007-2009*

- Developed diagnostic UI software for flow-cytometry hardware, supported hardware-software troubleshooting, and maintained a legacy scientific codebase.

Software Programmer | PACCAR *Bellevue, WA | 2006-2007*

- Added GPS/Wi-Fi capabilities and communication protocols for connected-vehicle tracking devices used across Kenworth, Peterbilt, and DAF fleets.

RECENT PRODUCT PROJECTS & EDUCATION

University of Washington - Certificate, Software Product Management (2025): Team driver for DietAlly, a yearlong Amazon Fresh concept. Built/tested a Wix PoC; conducted customer validation; translated findings into UX refinements, backlog priorities, roadmap phases, and success metrics.

Western Governors University - MBA, IT Management (Expected Aug 2027): Completed IT Project Management, Managing Organizations and Leading People, Managing Human Capital, and Marketing. Built SaaS modernization and sprint-planning case studies covering NFRs, UAT, backlog reprioritization, acceptance criteria, risk/dependency planning, and metrics.

Recognition: Two WGU Excellence Awards for exemplary work in Managing Organizations and Leading People (Tasks 1 and 2).

Seattle University - B.A., Computer Science; Mathematics/Physics Emphasis (2007)
