PROFESSIONAL SUMMARY

Product manager with a software engineering foundation and experience delivering mobile, cloud-connected, and hardware-software products. Built and launched an offline-capable mobile survey product, scaled a distributed engineering team from 2 to 12, supported approximately monthly releases, and contributed to \$20K-\$50K in recurring monthly revenue. Recent graduate-level and certificate work adds hands-on experience in SaaS project planning, backlog prioritization, user stories, acceptance criteria, non-functional requirements, UAT, customer validation, product analytics, market strategy, and cross-functional execution.

CORE COMPETENCIES

Product: Product Strategy • Roadmaps • Backlog Prioritization • Customer Discovery • Requirements • User Stories • Acceptance Criteria • Product Validation • UX Collaboration • Release Planning • Go-to-Market

Technical & Delivery: Agile/Scrum • SaaS • Mobile Products • APIs/Cloud Integration • UAT • NFRs • Risk/Dependency Management • Product Analytics & Reporting • Jira • Figma • Wix/Wix Studio • Generative AI Tools • Earlier Programming: Java, C++, C#, .NET, JavaScript, Python, SQL

PRODUCT EXPERIENCE

Product Development Manager | Survey Analytics *Seattle, WA | 2010-2012*

Enterprise survey platform and mobile field-research products

- Built the mobile product division from the ground up and launched SurveyPocket across iOS, Android, and Amazon marketplaces.
- Owned an offline-first survey workflow that let researchers collect structured data without connectivity and synchronize it to the Survey Analytics cloud platform when internet access returned.
- Scaled a distributed development team from 2 to 12 engineers and mentored four early-career developers across multiple time zones.
- Gathered requirements directly from enterprise and field-research customers, prioritized the backlog by customer urgency, and coordinated approximately monthly releases.
- Supported customers including St. Jude Medical and the Country Music Awards through discovery, training, troubleshooting, video tutorials, written guides, and product content.
- Supported approximately \$20K-\$50K in recurring monthly revenue through successful mobile deployments.

Product Owner | Reischling Press, Inc. *Tukwila, WA | 2012*

Personalized printing and enterprise custom-product programs

- Collected specifications for custom printing needs and coordinated requirements across approximately six functions spanning business, finance, production equipment, software development, and print operations.
- Designed company-wide Agile training and introduced Agile/Waterfall concepts to improve largely manual production-management processes.
- Supported custom enterprise requirements for Costco, Vistaprint, and Shutterfly and negotiated incoming contracts for materials, training, and software-development resources.

Product Management Capstone - DietAlly | University of Washington *Seattle, WA | 2024-2025*

Academic Amazon Fresh concept; four-person, yearlong product project

- Served as team driver, coordinating assignments, deadlines, and final deliverables across customer research, product strategy, UX, roadmap development, marketing planning, and presentation design.
- Helped design and build a Wix proof of concept for personalized grocery shopping with dietary filters, saved preferences, product transparency, post-purchase visibility, and recommendations.
- Used customer validation to refine UX and backlog priorities; a test campaign reached 189 people, produced an 11.1% landing-page conversion rate, and achieved a 70% survey completion rate among engaged visitors.
- Defined phased roadmap success criteria for filter engagement, purchases, recommendation usage, completed transactions, and returning users; built academic pricing, packaging, and launch scenarios using modeled assumptions.

GRADUATE PRODUCT & BUSINESS PROJECTS

IT Project Management - SaaS Modernization | Western Governors University *MBA Project | 2026*

Academic case study: seller portal modernization

- Produced an end-to-end project proposal for a live e-commerce/SaaS portal spanning seller customization, payments, localization, performance, security, and vendor delivery.
- Defined problem statement, scope, make-or-buy recommendation, measurable success criteria, WBS, stakeholder/risk planning, functional and non-functional requirements, integration design, test strategy, UAT, deployment, hypercare, and KPI tracking.

IT Project Management - Sprint Planning | Western Governors University *MBA Project | 2026*

Academic case study: medical-office SaaS

- Reprioritized a product backlog using customer complaints, support tickets, performance risk, and business urgency; added a new autosave story and strengthened notification acceptance criteria with auditability requirements.
- Built a four-week sprint plan with capacity forecasting, resource allocation, dependency/risk tradeoffs, UAT, performance instrumentation, release communications, customer feedback loops, and executive/engineering cadences.

Global Marketing Strategy | Western Governors University *MBA Project | 2026*

Academic case study: international launch strategy

- Developed a South Korea market-entry plan for a premium eyewear line covering segmentation, concept testing, competitive positioning, CRM data, direct-to-consumer distribution, pricing, supply-chain risk, and integrated media strategy.

LEADERSHIP & EARLIER TECHNICAL EXPERIENCE

Founder & Executive Director | Beauty Empower *Seattle, WA | 2009-2012*

501(c)(3) supporting domestic-abuse survivors

- Founded and operated a nonprofit providing self-care programming for survivors; built a 35+ volunteer network, partnered with approximately 5-10 community organizations, and delivered programming two to three times weekly.
- Managed donations, supplies, partnerships, scheduling, outreach, and operations; served approximately 35-50 survivors over the organization's life.

Software Engineer | Cytopeia Inc. / Becton Dickinson Biosciences *Seattle, WA | 2007-2009*

- Developed diagnostic UI software and GUI tools for real-time interaction with flow-cytometry hardware; debugged and maintained a legacy codebase and supported hardware-software troubleshooting.

Software Programmer | PACCAR Inc. *Bellevue, WA | 2006-2007*

- Added GPS and Wi-Fi capabilities to connected-vehicle tracking devices and designed communication protocols for mobile transmission of fleet data to PACCAR servers.

CAREER RE-ENTRY & ADDITIONAL EXPERIENCE

Career Break & Continuing Education | Renton, WA | 2013-Present

- Primary caregiver while completing formal product-management education, graduate business study, volunteer leadership, and structured preparation to return to the technology workforce.
- Maintained current capabilities through hands-on work in customer research, UX, roadmapping, Agile delivery, analytics, project planning, market strategy, and financial modeling.

Phone Bank Elections Worker | King County Elections *Renton, WA | Jul-Aug 2024*

- Supported voters in a high-volume, rules-driven environment by answering election questions, validating voter information, and maintaining accurate records.

EDUCATION & RECOGNITION

MBA, Information Technology Management | Western Governors University *Expected Aug 2027*

- Completed: Managing Organizations and Leading People; IT Project Management; Managing Human Capital; Marketing.
- Two Excellence Awards in Managing Organizations and Leading People for exemplary work in Task 1 (personal leadership effectiveness) and Task 2 (organizational and leadership evaluation).

Certificate, Software Product Management | University of Washington *Completed Jun 2025*

B.A., Computer Science; Mathematics/Physics Emphasis | Seattle University *2007*
